**N**elson Laboratories, Inc., was established in 1985 and is a privately owned testing lab specializing in microbiology. We also provide chemical and physical testing, and perform quality-assurance testing and validations for many Fortune 500 companies. Our staff is highly trained and skilled in providing quality testing and friendly customer service. Personal integrity is essential to all that we do.

We specialize in several different areas in the world of science:

**Aerobiology:** Barrier studies for products such as masks, surgical gowns, drapes, gloves, and other textile materials.

**Bioburden:** Determining the total amounts on viable biologic contamination of products as well as performing radiation sterilization validations.

**Biocompatibility:** *In vitro* studies to ensure products are compatible with the body.

**Chemistry:** Analytical chemistry testing for the medical device industry. Commonly performed tests include: HPLC, Gas Chromatography (GC), and Infrared Analysis (FTIR).

**Hospital Reprocessing:** Validating sterilization procedures for reusable medical products and equipment.

**IDs:** Microbial identification of bacteria, fungus, and yeast using sophisticated equipment and techniques.

**EO:** Ethylene Oxide sterilization validations including Biological Indicator (BI) Sterility testing.

**Packaging:** Performing packaging validation testing, including barrier validation and shelf life studies in accordance with ISO guidelines.

**Microbiology:** *Limulus* amoebocyte lysate (LAL) testing and environmental studies including water system validations.

**Pharmaceuticals:** Filter validations, disinfectant validations, Antimicrobial Preservative Efficacy (APE) testing, potency assay, and particulate analysis.

**Sterility:** Sterility testing in a ISO class 5 cleanroom.
